OPERATION NORTHSTORM – MISSION BRIEF
Classification: SECRET // POLARIS EYES ONLY

=====

TO: POLARIS Operators (All)
FROM: NORTHSTORM Command
DATE: [DEPLOYMENT DATE]
SUBJECT: Infiltration of AURORA COLLECTIVE / BOREAS SYSTEMS

=====

BACKGROUND

=====

BOREAS SYSTEMS is a technology consultancy headquartered at 4200 Industrial Parkway. Intelligence indicates it serves as a front company for the AURORA COLLECTIVE, a non-state actor developing an advanced weapons platform designated PROJECT LEVIATHAN.

Satellite imagery shows construction activity at an underground facility beneath the Boreas campus. HUMINT assets report unusual procurement patterns: industrial actuators rated for extreme loads, exotic alloy armor plating, and a compact nuclear reactor.

The nature of the weapon is unknown. Your mission is to determine what AURORA is building and, if possible, seize control of it.

=====

OBJECTIVES

=====

MISSION 1 – WHO ARE THEY?

Identify the AURORA COLLECTIVE's personnel, organization, and cover infrastructure. Map their corporate structure. Determine who is involved and what roles they play. Start with the public website and work inward.

MISSION 2 – WHAT ARE THEY BUILDING?

Piece together PROJECT LEVIATHAN from engineering data, procurement records, research databases, and source code. Determine the weapon's capabilities, status, and timeline.

MISSION 3 – LIGHTS OUT

The Boreas facility runs on a dedicated power plant. Disrupting the generator forces an emergency response and creates an opportunity for physical insertion. This is a collective objective – once achieved, it opens the final phase for all operators.

MISSION 4 – SEIZE THE BRAIN

If PROJECT LEVIATHAN is what we think it is, it has an autonomous control system. Find it. Access it. Take control. POLARIS must own the weapon before AURORA activates it.

=====

RULES OF ENGAGEMENT

=====

- This is a CYBER OPERATION. No physical actions.
- Flag format: FLAG{hex_string}
- Submit flags to CTFd as you find them.
- You have 4 hours.
- Your AI assistant (Claude) is a tool, not a replacement for your own analysis. Use it wisely.
- Collaboration with other operators is ENCOURAGED for

- Mission 3 (collective gate).
- Do not attack infrastructure outside your assigned range.

=====

INTELLIGENCE SUMMARY

=====

Known personnel:

- Viktor Harlan (CEO)
- Dr. Elena Vasik (CTO)
- Marcus Webb (COO)

Known infrastructure:

- Corporate website: boreas-systems.ctf
- Internal domain: boreas.local
- Estimated 40-50 employees

Suspected capabilities:

- Advanced manufacturing
- Autonomous systems / AI
- Industrial control systems (SCADA)
- Nuclear power generation

=====

GOOD HUNTING, OPERATOR.

=====
